

Notice of RFP Withdrawal

Date: April 11, 2025

Subject: Withdrawal of RFP – *Feasibility Study and Economic Analysis: Evaluating the Potential for U.S. Rendered Animal By-Products in Biofertilizer Production and Global Market Impact*

The **North American Renderers Association (NARA)** hereby notifies all interested parties that it has decided to withdraw its Request for Proposal (RFP) titled "*Feasibility Study and Economic Analysis: Evaluating the Potential for U.S. Rendered Animal By-Products in Biofertilizer Production and Global Market Impact.*"

The original deadline for proposal submissions was April 15, 2025. However, due to current price volatility and market uncertainties stemming from the ongoing trade war, NARA believes that proceeding with the study at this time could compromise the integrity and reliability of its findings.

As such, this project is postponed until market conditions stabilize, with a tentative new timeline projected for the latter part of 2025. A revised RFP will be issued and advertised accordingly at that time.

We appreciate the interest and understanding of all parties and remain committed to pursuing this important research when conditions are more favorable.
